

RECTOR OF CENTRAL INTELLIGENCE

Executive Registry

85- 4395

12 November 1985

MEMORANDUM FOR: DDI

FROM: DCI

SUBJECT: National Intelligence  
Strategy--Analysis and  
Production Capabilities

I beefed up the HUMINT and technical intelligence sections of the National Intelligence Strategy, as well as other phases of this strategy which needed to be expressed much more amply.

Analysis and production needs much more than this, particularly coming off the material on the greatly expanded collection which will be needed to handle the expanded range of major targets.

Will you get somebody to develop this at least three times more amply.

  
William J. Casey
